Authorized as second class mail, Post Office Department, Ottawa.

## CARBON NEWS

Mr. and Mrs. D. Fox spent a few days in Calgary this week.

Honoring Miss Sybil Pallesen whose marriage takes place this month, Miss Elaine Torrance entertained a number of friends last weekend at a Gadget and Nick-Nack shower.

We notice the "Baby Ruth's" of the future out to practice these evenings.

Mr. and Mrs. J. Adams spent the week-end at Olds.

Mr. and Mrs. F. Emery spent the week-end with Mr. and Mrs. W. Skerry, Didsbury.

Dick Gimbel has his lots next to Ross Thorburn's residence, levelled off and plans to move his house to that location as soon as possible.

The UYP held a debate in the church parlor on Tuesday evening. A good crowd attended.

Sid Wright and Maurice Switzer were Calgary visitors on Tuesday.

Is Carbon on fast time? If so, why does the curfew ring at ten o'clock instead of the usual 9 o'clock? Has there been a proclamation issued? If so where is it? Information appreciated.

Messrs. Louis Schmaltz, F. J. Schmaltz and Max Wald were business visitors to Carbon on Tuesday evening. They informed us that both Beiseker and Irricana are on standard time.

Mrs. J. Adams attended the funeral of her aunt in Calgary on Wednesday.

Mrs. C. Pattison spent Tuesday in Drumheller.

Harold Greenlee was a Calgary visitor Wednesday.

The Misses Joan and Peg Heath spent last week-end in Carbon.

The I.O.D.E. are sponsoring a Rose Ball in the Scout Hall, June 27th. Trochu Orchestra.

Lindsay Elliot visited Carbon on Monday evening and put on a fine display of shooting at the local gun club which was enjoyed by members and a large crowd of spectators who attended. Lindsay is a brother of W. B. (Brock) Elliot of Entice.

Repair work is progressing at the Bank of Montreal bldg.

The weather the past week has remained dry. Farmers are all busy seeding.

Rev. Warren of Blackie has accepted a call to Carbon United Church.

Mr. McQuarrie of Calgary is the new agent for the Midland Pacific Elevator Co.

Members of the I.O.D.E. spent Wednesday evening planting trees in the village.

Funeral services for Mrs. S. Heuther will be held in the S.D.A. church, Sunday at 2.00 o'clock, MST.

Carpenters have been busy this week renovating Nash's store where the Alberta Poultry Producers intend to move the Carbon egg grading station.

There will be a Zone Social Meeting at Strathmore on May 22nd. A number of Carbon Lions plan to attend.

Mr. and Mrs. Bill Boyarchuk are moving to the coast in a couple of weeks which will leave Carbon without a shoemaker.

Mr and Mrs. C. Switzer of Calgary were Sunday visitors at the home of Mr. and Mrs. M. Switzer.

What time will the clock stop? Take a guess today!

The Carbon Branch of the Canadian Legion held a Smoker in the Legion Hall Wednesday evening.

Some local nimrods found a magpie harder to hit than a clay pigeon when they tried their luck hunting this pest Wednesday afternoon.

How about that renewal to The Chronicle? It will be appreciated at this time.

## IN MEMORIAM

ZIEGLER — In loving memory of Fred Ziegler, who passed away May 9, 1945.

Hearts that loved you never forget  
In memory you are with me yet.

Dearly beloved and ever remembered by his wife Louise.

## CHILD DROWNED IN POOL

We read every day where children are being drowned in rivers, lakes and pools. Do we want that to happen in Carbon? We have a fine swimming pool in our park, but alas, no sign of any life saving equipment.

The Carbon Lions are trying to prevent an accident at our local pool by raising money to provide life saving equipment by the sale of guesses on a clock guessing contest. And besides that they are giving \$100 in prizes to the holders of tickets guessing the nearest time the clock will stop.

This is a fair proposition. Your contribution will assist to provide the equipment and if you are lucky will win you a prize. Take a chance today!

## NOTICE

Please claim all shoes left in the shoemakers shop for repairs by May 17th, 1947.

B. Boyarchuk.

## NOTICE

A meeting of the ratepayers of Carbon School District No. 1218 will be held on Friday, May 9, 1947, at 8 p.m. at the Village Office, Carbon, to procure information re possible advantages to merger the District with the Drumheller School Division.

## B. OF M. CROP REPORT

Seeding is general in most localities. Moisture reserves are good. Wheat acreage will be reduced with corresponding increases in coarse grains, including flax. Damage is reported to winter wheat necessitating reseeding of spring varieties. Sugar beet planting will be two to three weeks later than normal.

## FARM IMPROVEMENT LOANS REPORT

During 1946, 13,030 farmers obtained loans totalling nearly \$10,000,000 under The Farm Improvement Loans Act. A report covering the first full year's operation of this Act was tabled in Parliament recently by Finance Minister Abbott.

Loans are made through the 3,100 branches of the chartered banks for the improvement and development of farms and for the improvement of living conditions on farms. The interest rate is five percent simple interest per annum, and loans may be made up to ten years. The legislation aims at assisting particularly the average farmer who in the past has not always been able to obtain bank credit for farm improvement purposes.

Farm implements and farm trucks account for \$7,488,247 of loans made during 1946. These loans represent an actual sales volume of approximately \$12,500,000. From information available it is reasonable to assume that practically all farm implement sales in Canada requiring financing are now being financed either through loans obtainable under The Farm Improvement Loans Act or through regular bank loans. The result should be a substantial saving to the farmer not only in the purchase price of his farm implements but also in finance charges and interest rates previously prevailing for this type of financing.

Included in the total are loans to 1,008 farmers to clear and break an estimated 50,000 acres of new land, mostly in the pioneer sections of western Canada. Loans for foundation and breeding stock accounted for 303 loans totalling \$190,937.

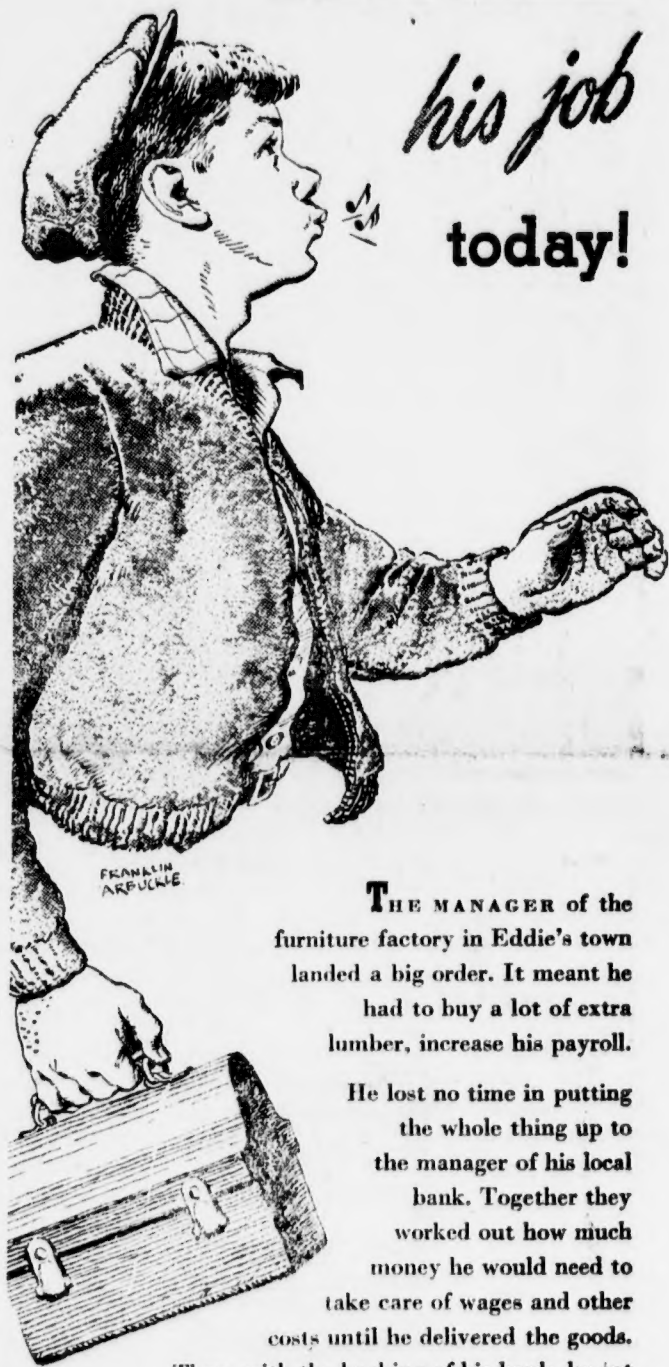

One of the most important classes of loans is that for the construction, alteration and repair of farm buildings including farm dwellings and separate houses for farm help. As the supply of material and labor becomes more adequate, it is expected that loans for these purposes will be greatly expanded.

The Canadian Union College of Lacombe will present a program of sacred music and songs at the SDA church, east of Beiseker, on the evening of Saturday, May 10th, at 8 p.m. MST. The choir includes 45 voices besides many others participating. Everybody is welcome together.

## NOTICE

The Senior Group of the Carbon Ladies' Aid will serve a "Business Man's Supper" in the Scout Hall, Saturday, May 10th commencing at 5:30 o'clock. Everybody come and bring your friends to enjoy a meal together.

Eddie started  
his job  
today!

THE MANAGER of the furniture factory in Eddie's town landed a big order. It meant he had to buy a lot of extra lumber, increase his payroll.

He lost no time in putting the whole thing up to the manager of his local bank. Together they worked out how much money he would need to take care of wages and other costs until he delivered the goods.

Then, with the backing of his bank, he got to work on the order.

... And that's where Eddie came in. He was put on the payroll—given his first chance to learn a trade. Right now he's on his way home to tell Mom and Dad how much he likes his new job.

**OUR HALF ACRE**

By J. G. Umbrite

Soil has been described as being the farmer's chief capital asset. Soil drifting is causing serious financial loss in Alberta. The fertility of the land is being reduced. It is difficult to measure accurately the damage caused by soil drifting.

Soil drifted from one acre to the depth of one inch is equivalent to the removal of 694 lbs. of nitrogen, 155 pounds of phosphorus and 5,380 pounds of potash. The above amount of potash alone is approximately equal to that removed from the soil in the production of 485 bushels of wheat. It is estimated that it would require from \$200 to \$350 per acre in commercial fertilizers to restore these vital minerals. These elements can be replaced to some extent by commercial fertilizers, however the surface soil also contains humus and living organisms which affect the soil productivity. These can not be replaced commercially.

It has been said that the best cure for soil erosion is the prevention of it. The following methods should be employed if soil drifting is to be prevented.

1. Reduce wind velocity near the surface of the ground. This can be done by strip farming and maintaining a trash cover on the summerfallow.

2. Protect soil surfaces with cover crops, trash, manure or straw.

3. Cultural practices that leave clods and lumps on the surface.

4. Crop rotations with grasses and legumes included. Continued grain production pulverizes the soil.

5. Catching the particles of soil as they start to move, listing, plowing furrows, scattering straw, etc.

To prevent soil drifting, only those implements should be used that will leave a maximum amount of stubble as a trash cover on the surface.

If you are interested in solving a soil erosion problem see your district agriculturist or field supervisor and let them help plan your program.

**PRICES BOARD BRIEFS**

A study of the flow of scrap steel to the mills reveals that it has been very slow and no revision is anticipated in the price. At the same time all dealers were urged to exert every effort to support Canada's steel production by a steady flow of scrap metal to the consuming mills.

The first canning sugar coupons for 1947 become valid during the month of May. The canning sugar quota for the year is the same as in 1946, 10 pounds per person, the first five becoming valid May 15th. These are coupons Y1 to Y5 inclusive. This is in addition to the eight pounds of sugar allowed per quarter for general consumer consumption.

About a quarter of a million British people raise rabbits, producing at least 120 tons of meat weekly, according to a London survey.

**WANT ADS PAY**

**FARMER'S COLUMN**

By R. J. Milligan  
District Agriculturist  
M. D. of Serviceberry

Many farmers are now receiving their registered seed grain ordered through the Strathmore and District Seed Growers Association. This seed bears a registration tag. These tags should be retained by the purchaser and submitted to the Dominion fieldman when he comes to make your field inspection. High priced seed should receive every attention possible by the purchaser. Therefore I recommend that it be treated with one of the mercurial dusts. At time of treating is where mixing of varieties might well begin, so be sure all machines, platforms, seed drills or tillers are thoroughly clean. A small air pump used for gasoline lamps or a tire pump will help to clean machines. I would further recommend that this seed be resacked in the same bags as when received for transportation to the field.

To clarify a point often misunderstood, generation and registration. Generation refers to the generation removed from elite seed. That is, if grown for two years the resulting grain would be third generation. The registered number 1, 2 and 3 seed refers to the quality. Seed may be first generation but because of light weight, smut or weed seeds, the quality may be lowered to a number three. And again, you may have third generation which is of first quality, namely registered No. 1. It is interesting to note that new regulations list only first generation and all other seeds are registered.

Those interested in producing registered grain from stocks bought this spring should make application to Mr. A. Wier, Plants Products Division, Dominion Department of Agriculture Calgary, before July 1st. For the benefit of our seed cleaning plant, this should be done by the majority of our new seed growers. This application must show your name, address and correct land location, together with the kind and variety of crop to be inspected.

Some care should be taken when planting this good seed. See that it is sown on clean summerfallow or new breaking. Stubble land is a poor bet as volunteer grain makes roguing a much bigger task. When seeding be sure to leave a margin around the outside of the field that can be cultivated to keep weeds killed. If to be sown paralleling similar grain but of a different variety, leave a margin of at least one rod. This is necessary to prevent mixing at harvest and cross fertilization by wind. This latter recommendation must be adhered to.

During the summer frequent trips must be made through the field to pick out impurities and other grains. This is called "roguing" and should be done carefully. If part of the field is contaminated by other grains washed onto your field, isolate these spots or cultivate them out.

This subject is too large to treat in one article so look for more next week.

**BOOST ON BUTTER OUTLINED**

Following the government announcement April 30th the producer butterfat subsidy amounting to eight and one-half cents per pound for butter would be cancelled the WPTB declared the ceiling on creamery butter would be increased by 10c per pound at all trade levels effective May 1.

This action follows over-all government policy in removing subsidies and transferring these subsidies into price. The price increase over and above the actual amount of the subsidy is given as an encouragement to greater butter production. It was stressed in the announcement that the Prices Board regulations do not allow retailers to increase the price of butter to consumers on stocks held in the store at the close of business April 30. At the same time the Board announced that in order to maintain the producer price relationship, two cents per pound will be added to the ceiling prices of both dairy and whey butter, to become effective on the same date.

There is also an increase of three cents per pound at the manufacturers' level in the ceiling price of cheddar cheese in order to replace the subsidy paid on this product. This will mean an average increase to consumers of approximately four cents per pound.

Also at the same time the ceiling price on evaporated milk was raised by 30c per case and this will mean an increase to the consumer of one cent per tin.

Following similar action on other items where the subsidy was removed inventory profits will be recovered on all stocks of butter for resale held in storage as of May 1. The following notice has been sent to the trade.

"Every person who at the close of business April 30 holds or has in his possession, or under his control, in creameries, or in public, semi-public, or private cold storage warehouses, or in transit, creamery butter of any grade or grades, for sale as such, shall remit to the Commodity Prices Stabilization Corporation, Ltd., Ottawa, 8 1/2 cents for each pound of creamery butter."

## SEARCH IS UNDERWAY FOR E. B. BOTTLES

E. B. Bottles, believed hiding in attics, basements and garages became subject for intensive search by Carbon tensive search by Beiseker tensive search by Rockyford citizens.

Commonly known by the full name of Empty Beer Bottles, this culprit is responsible for the present shortage of bottled brewery products, and consequently a reward of 20 cents per dozen is being offered for successful apprehension.

Housewives are taking the lead in this search for E. B. Bottles, realizing that recovery will serve a three-fold purpose. It will help consumers to get more of their favorite beverages; it will provide more space in cupboards pantries, basements and garages, and it will put badly needed bottles back on the job and enable bottlers to continue full operation.

All citizens are urged to be on the lookout for the fugitive. His favorite haunting places around the home should be thoroughly searched, and in the event of apprehension, Deliveries Limited, Agents for Alberta Brewing Industry, should be notified.

### Cash Reward Waiting

Arrangements have been made in the cities for taking "Bottles" into custody at the place he is discovered, and escorted to depot. Cash reward will be paid at scene of arrest amounting to 20 cents per dozen. Freight agents are co-operating and all rural vigilantes need to do is turn "Bottles" over to one of the agents and he will be escorted collect to nearest Deliveries Limited Depot at Camrose, Calgary, Blairmore, Banff, Drumheller, Medicine Hat, Lethbridge or McLennan.

## THE CRACKER BARREL

Continued from back page  
olition of excess profits tax for next year. Britain and United States both abolished that tax more than a year ago.

Indirectly business got, from the cut on our income taxes, the release of a large amount of buying power, more customers with money to buy. Business also got some very sound advice from the minister of finance which will benefit itself and Canadians generally, "keep the prices as low as possible."

### Our American Friends

It is difficult to find any crystallized opinion on the question raised by a former secretary of State of the United States: Should Canada join the Pan American Union? There are, of course, a few imperialists who believe that such action would be treason to Britain and to our membership in the British Commonwealth. There are also a few extreme nationalists who would welcome the move for that very reason. It is safe to say that neither of these views represent any appreciable number of Canadians.

The only question in the minds of most observers here is: How can we contribute most to the peace and prosperity of the world? It is difficult to see where our present position could be improved by joining the western hemisphere organization. Few attempt to claim that we would have more influence or prestige as a member than we now have in North and South America. Some felt that we would actually have less influence than we now have as an independent with influence in both the old and new worlds.

## ENTRIES REQUIRE CORRECT SEED

Contestants in this year's National Barley Contest are warned by the contest committee to make sure that they obtain pure seed of one of the recognized malting varieties. Of the 1,234 entries received last year a considerable number had to be eliminated because they were not growing a malting barley.

The varieties which may be grown for the contest are the same as last year, Montcalm, O.A.C. 21, Olli and Mensury. These varieties are eligible for No. 2 C.W. Six Row and higher grades and are the malting varieties eligible for western Canada.

The contest committee in its book of instructions, which contestants may obtain from their nearest elevator operator or local agricultural representative this year has recommended varieties most suitable for each province of the western division. They are Montcalm, O.A.C. 21 and Olli.

Montcalm and O.A.C. 21, it will be noted, are recommended as suitable for any part of the western barley area.

It is estimated that the weight of enemy bombs and V weapons dropped on London was 12,770 tons.

A Toronto man charged with vagrancy admitted drinking three bottles of tomato catsup in a local cafe.

Breeders in Norway are favoring blue fox which is now becoming popular over the silver and platinum variety.

## SEED SAWFLY TRAP STRIPS

A sawfly outbreak is forecast for 1947 and one of the most urgent jobs in Alberta's sawfly area right now is the seeding of sawfly trap strips to protect the main wheat crop. The grubs are now in the stubble of last years wheat fields and will emerge as flies in June to lay the eggs in the new stand of wheat.

J. L. Eaglesham, supervisor of pest control, warns that whether or not the summerfallow is ready for seeding trap strips should be seeded first of all. Seed two or three drill widths of early wheat into the infested stubble up along the sides of this year's wheat crop. If seeded shallow in the moist stubble now, these strips will develop fast enough to receive most of the eggs from all the sawflies that will presently emerge from the stubble field. There will then be little or no harm to the main crop.

A half day's seeding of trap strips now will pay off handsomely this fall. Those who have adopted this practice find it a real crop saver.

Only about 5,000 stars are visible to the naked eye; not more than 2,000 at any one time

## WORLD OF WHEAT Conditions in Europe

We have heard in recent months contradictory reports about whether the people of Britain and Europe were well or poorly fed, about whether Britain and other countries were rapidly reviving or whether they were slipping further back, and about what the chances were for Canada to sell wheat and other products to Europe in the future. The Searle Grain Co., therefore, sometime ago decided to send me to Britain and Europe to observe at first hand just what the conditions were.

After some seven weeks away I have now returned with many vivid impressions about what I saw and heard in these countries. For the benefit of the readers of this "World of Wheat" column I will relate from time to time what I have seen, and I will take the liberty of making suggestions which I think should be adopted in order to help Europe once again to resume her rightful place as the greatest market for Canada's products.

The most vivid and first impression I wish to convey is that Canada is the best country in the whole world in which to be living today. Our people are

far better fed than those in Europe and the opportunities here for success, for prosperity and advancement, are miles and miles ahead of any opportunities in Britain or in the other countries of Europe.

## WM. VELKER DIES APRIL 30

The death occurred in a Calgary hospital on Wednesday, April 30, of William Velker, 39, after a lengthy illness.

Mr. Velker moved to Beiseker with his parents from Medicine Hat in 1924 and worked with his father in the blacksmith trade. He later farmed at Sunnyslope and Beiseker.

He was a member of St. Mary's Church and a member of the Knights of Columbus.

He was one of the first members of the Beiseker Band when it was organized in 1929 and again when it reorganized in 1946 being the base drummer.

Surviving are his wife and seven children.

Requiem high mass was held in St. Mary's church, Beiseker, on Friday at 10.00 a.m. Interment in Beiseker cemetery.

McInnis and Holloway were in charge.

Discussion, on last week's budget and the budget speech delivered by Finance Minister, Abbott still predominates in Ottawa circles. The outstanding feature of the discussions is an attempt to see behind the scene of Canada's economic and political welfare for information on which to base a forecast of the future. All agree that Canada is more prosperous than at any other time and that her prosperity reaches a larger proportion of her people than ever before. The question in many minds is: Is our prosperity so soundly based as to give a reasonable guarantee that it will last?

*Prosperity Based  
On Production*

Few dispute that our prosperity is based on our production of goods and services which, it is estimated, will be more than twelve billion dollars this year, higher than the peak of wartime production. Our debts to other countries are 35 percent lower than before the war and in 1946 our sales to the world were greater than our purchases. Can this high level of production and sales, which means a high level of employment be maintained. Informed observers claim that Canadian purchasing power and a large part of the big expansion of industry can continue only if our sales to other countries is maintained. If this is correct it is clear that the interest Canadians have been taking in the Moscow conference of foreign ministers and in Geneva conference on international trade is overwhelmingly justified even on the basis of our own self interest, because without a settlement of the European problem and an agreement to lower all barriers to trade the basis of our present prosperity will be substantially reduced.

*Communists Disappointed*

It is obvious that Canada's communists and extreme left wingers are disappointed at signs of continuing prosperity. Having predicted a depression and mass unemployment it sometimes appears that they are hoping that condition will appear. They make every effort to discourage the hope for world peace and world trade. By continuous talk of disaster and depression they hope to create that condition by shaking the confidence of our people. It is an insidious and sinister campaign that we must guard ourselves against.

*Does Business  
Get Anything*

The Ottawa Journal criticizes the federal governments budget on the ground that "Business gets little" out of it. Perhaps it is true that business gets little out of it directly except the ab-
